No. 23

Shall We Organize

Clearly we are living in perilous times! Conditions which try grown ups must be expected to try more severely the youth.

This is a time of testing for our schools. Many problems confront them. If they are to come through the test successfully we must all pull together.

Most of us are ready to pull if we only could see how to do it. Would it not now be in order to form a Parent Teachers' association?

Several advantages of such an organization came to our minds. We don't get together enough. We don't know enough about what the other fellow is doing. Sometimes we might be pulling against each other or even against ourselves without knowing it. Sometimes, because we are toiling by ourselves, we get a bit "weak in the faith", so to speak, and wonder if it is all worth while. We might, without knowing it, be right on the verge of losing priceless privileges and possessions. We might be running after bubbles and bubbles and leaving unattended pearls of great price. Some enlightening and encouraging meetings of the people most vitally concerned would help, in many ways.

We commend this matter to the thoughtful attention of our readers.

Thyra Quinton of Cardston is visiting here for a week, and has spent most of the time with Mrs. Ruby Holand, who lived in Cardston until recently.

I. M. HARDUP TAKING IT FULL ON THE CHIN

This poor fella can't see the corner around which prosperity is hiding, awaiting the arrival of brighter minds to stir it out of retreat.

I. M. HARDUP.

Downout, Oregon.

July 13, 1932.

Ketchikan & Skinnia,
Collection Agents,
Chicago, Illinois.

Gentlemen:

I wish to inform you that the present condition of my bank account makes it impossible for me to send you a check in response to your request.

My present financial condition is due to the effect of federal laws, state laws, by-laws, brothers in laws, mother in laws and out laws that have been foisted upon an unsuspecting public. Through these various laws I have been held down, held up, walked upon, sat on, flattened and squeezed until I do not know where I am, what I am, or why I am.

These laws compel me to pay a merchant's tax, capital stock tax, income tax, real estate tax, property tax, auto tax, gas tax, light tax, car tax, street tax, school tax, syntax and carpet tax.

In addition to these taxes I am requested and required to contribute to every society and organization that the inventive mind of men can organize, to the society of St. John, the women's relief, navy league, the children's home, the policemen's benefit, the foreman society, the Y.M.C.A., the Boy Scouts, the Jewish relief, the near relief, the gold diggers, home, also every hospital and charitable institution in town; and Red Cross and the black cross the white cross, the purple cross, and the double cross.

The government has so governed my business that I do not know who owns it. I am suspected, expected, inspected, disrespected, examined, informed, required, commanded and compelled until all I know is that I am supposed to furnish an inexhaustible supply of money for every known need, desire, or hope of the human race, and because I refuse to donate to all and go out and beg, borrow or give away, I am cursed and disrespected, boycotted, talked to, talked about, lied to, lied about, held up, held down and robbed until I am nearly ruined.

The only reason I am clinging to life is to see what the Hell is coming next.

Respectfully yours,

I. M. HARDUP.

News Notes The Rumble Of

A Distant Drum

(Editorial in "The Commerce of the Nation")

Be sure and see The Barrymore Brothers in 'ARSENE LUPIN'.

R. W. Tollestrup purchased a new Oldsmobile Sedan last week. It is a very classy looking car.

Mr. and Mrs. Geo. Court and Mr. and Mrs. Vern Henry were Waterton Park visitors over the week-end.

'TAKA CHANCE SHOW' Aug. 19 at the Capitol.

Mr. and Mrs. Bob Graham and family were in Waterton during the week-end.

Mr. and Mrs. S. I. May and family were in Cardston and Waterton over Sunday last with relatives and friends.

T. Geo. Wood took a bunch of boys to the Fathers and Sons Outing on Monday evening last.

Cecil Finch is holidaying from the factory now, and they are on a motor trip.

Rowan Stutz, of Cardston, who has been visiting his aunt Mrs. C. Litchfield and family for a few days returned to his home on Saturday.

The bus driver stated Saturday morning that there had been no rain in Magrath and that Weir had been hit by hail.

Grant Holt is visiting in Raymond for awhile after several months absence in Vancouver, Seattle and other coast points.

Mr. and Mrs. Duncan Weaver and party spent a few days last week in Waterton Park returning home the first part of the week.

W. C. LaMarr was in Raymond on Saturday last. He is now working in Fincher Creek and reports things pretty good in that town.

Mr. and Mrs. D. C. Wight of Cardston were Raymond visitors Saturday morning. Mr. Wight is Editor of the Cardston News.

F. R. Taylor and a carload, left Monday forenoon for the Fathers and Sons Outing at Camp Kootenai.

S. I. May was a visitor to Magrath on Monday of this week on business.

Mr. and Mrs. Jas. McLean of California, are spending a short vacation with relatives and friends here "Jim" says this is the best looking district enroute.

Born to Mr. and Mrs. Kenneth L. Stone at St. Michael's Hospital Lethbridge on Saturday August 6 a baby girl. Mother and babe are doing nicely and Ken is proud as a peacock.

Mr. and Mrs. Mayfield, and Mr. Nellie Cronin, all of Salt Lake City are visiting Mr. and Mrs. H. C. Coles for a month. Mrs. Cronin and Mrs. Coles are sisters.

W. H. Zobel took out a second hand blinder from the Massey-Harris warehouse on Saturday of last week.

J. D. Hall delivered a new Froed and Wood Binder to Louis Metzger last Saturday.

The Greener Girls and M. M. of the Raymond Second Ward spent Saturday afternoon last in a car party to Henderson Lake Park, Lethbridge.

Laidlaw's Dry Goods Store one of Cardston's old land marks was badly damaged by fire last Wednesday afternoon the fire being first noticed about 6:30. No cause can be given but it is believed it was caused by spontaneous combustion.

A Diamond City farmer has fixed his crop of wheat for hay this year by cutting them just before they head and then plowing the stubble under for summer fallow. He expects that this will clean up the land and also give him some good feed.

Mr. and Mrs. C. O. Nalder were Lethbridge visitors on Saturday last.

'TAKA CHANCE SHOW' Aug. 19 at the Capitol.

Mr. and Mrs. T. T. Mendenhall are vacationing this week.

John L. Gibb of Magrath was a Raymond visitor on Tuesday of this week.

Be sure and see The Barrymore Brothers in 'ARSENE LUPIN'.

Pres. Allen is around again after his attack of rheumatism and is feeling pretty well now.

14 soldiers died of sunstroke while on parade in Shanghai on Monday. The army was undergoing inspection at the time.

The Buck Ranch Colony unloaded a carload of lumber at the local yards on Wednesday of this week. Shingles and dimension stuff were the make up of the car, probably for granaries to store the wheat in.

A day of race and sports under the direction of the Fincher Creek Agricultural Society was held at Fincher on Wednesday. Fairs, probably because of a lack of finance seem to be getting the go by this year.

Sam Dyson, Bill Hawkins and Fred Romeril, Jr. returned home on Monday after a week's holiday at Waterton Park, reporting a wonderful time. It was Sam's first visit to Waterton and he is loud in his praise of the lake and mountain scenery of this famous resort.

R. W. Greenway, President of the Lethbridge Board of Trade was elected President of the Sunbury Trail Association in their recent Convention in Great Falls and the city of Lethbridge was selected as the next meeting place for the Convention next year.

When the Hyle well in Turner Valley blew up with a terrific head of gas, and burned the derrick and other costly equipment valued at \$15,000, owners of the well intimated they may start suit for damages against the gas conservation board of the Province. The blow up occurred when gas board officials were on the ground.

A grass fire east of town on the corner of the Knight Sugar Co. land got out of control on Monday afternoon and threatened the house where Mr. and Mrs. W. Boehme live. The fire brigade was called out, and soon had the blaze under control around the house, but quite a bit of hay was burned up, and other nearby property was threatened for a little while.

Stock on the New York Market on Monday were up again from \$1 to \$5 per share over Saturday's close, which witnessed increases as much as \$12 in some lines. This is the greatest activity for months in the stock market, and is likely to cause an improvement in conditions if it remains higher.

2,000-BARREL FLOW IN SOUTH WELL CONFIRMED

Sweet Grass, Mont., Aug. 8—(Special to the Herald)—Border oil circles are talking of nothing else today but the sensational Askalta-Farbo No. 6 well. Visitors are kept away from the well because of the tremendous pressure being estimated that a gas flow of more than 15,000,000 feet is accompanying the crude oil. Estimates of the production of the new gusher vary, but Fred Platt, expert of the Northern Montana Oil Information Bureau of Shelby, said he figured it was good for between 3,000 barrels. The well is on the Farbo farm, Mr. Farbo being an old-timer. Before this big well came in his royalties were \$25 a day, and it looks like the old timer is now sitting "on top of the world". —Lethbridge Herald.

It is inconceivable that there never existed in history such an economic opportunity as is before the nations of the British Empire today. The Imperial Economic Conference now in session is evidence that the Empire peoples are seized with a realization of their business opportunities and that they are prepared to explore practical ways and means to bring them to accomplishment.

Although many leading statesmen and business men have endeavored to promote a forceful public opinion in favor of intensified trade within the Empire, it required the actions of foreign countries to bring the ideal more prominently before the British people. It has been the excessive tariff manipulations of foreign politicians which, probably more than any other factor, have served to impress the Empire people with their Imperial economic possibilities. Empire trade has for us become an economic necessity rather than a sentimental attachment. Yet, let it be clearly understood that Empire trade does not mean economic exclusion unto ourselves. Great Britain and the Dominions are fully prepared to negotiate trade agreements with countries outside the Empire. But those agreements shall have to be of a very different calibre from prevailing commercial policy. The Empire seeks profitable foreign trade in whatever quarter it may be found so long as that trade is a fair trade and consistent with sound business principles and economic law.

It is most encouraging that in the leading statements preliminary to the Conference, economic co-operation has been emphasized. In a world in which economic restriction seems to be the watchword of governments and even of certain business groups, the possibility of co-operation appeals to business men and hence Empire trade has gripped the imaginations of the business community.

Another encouraging factor in approaching the Conference was the remarkable absence of any apparent playing of politics. The spirit of fair bargain for mutual profit, of giving here to take there, of "taking the large view," has been quite evident in the business community and, if one can judge from statements and reports, that same desirable spirit has suffused the minds of our Empire statesmen. It seems apparent that the delegates to the Conference are seized with a broad vision of Empire and of the undoubted fact that the wider the co-operative policy adopted the more tangible will be the economic benefits enjoyed. It is certainly to be hoped that during the Conference the delegates will scrupulously avoid any tendency towards political opportunism and that they will be particularly careful not to lose themselves in a labyrinth of insignificant detail. Although it has been suggested that some may be inclined to peddle controversy, we believe that the force of present circumstances is a powerful arbiter and that despite the claims and counter claims which may be put forward, there is reason to look for a happy issue out of the Imperial deliberations in Ottawa.

The Conference has just begun. The ears of the Empire peoples are keenly attuned to present happenings and probable results. Agreements among the Empire countries can even now be sensed and, to take a thought from Omar Khayyam, are as the rumble of a distant drum coming nearer and louder as the Conference progresses and the realization of our Empire economic ideals is about to be announced. —The Commerce of the Nation.

Officials in Edmonton have advised "That No Harvest Help will be wanted from the East this Year." Evidently there is sufficient local labor.

Yields of other tree fruits are as follows: Plums and prunes 100 p.e. apricots and pears 90 p.e. pasturage is plentiful.

Bank of Montreal Crop Report

(Winnipeg, August 8, 1932)

GENERAL

Crops over the southern areas of the three Prairie Provinces and in central Saskatchewan have suffered from extreme heat and lack of rain during the past two weeks and yields will be reduced. In northern areas the crops are making favorable progress. Cutting is now under way in all southern districts and is fairly general in Manitoba. Hail damage has been slight. In Quebec weather conditions have been favorable to the growth of all crops, although intermittent rains have retarded the harvesting of hay which is generally under average in yield but excellent in quality. In Ontario frequent rains have benefited most crops but have delayed harvesting and a period of warm dry weather would be beneficial. In the Maritime Provinces heavy rains have provided ample moisture for grain and root crops and warm dry weather is needed. In British Columbia unsettled weather has interfered with the harvesting of early crops. Grain crops are doing well but warm weather is needed to bring them to maturity. Details follow:—

PRAIRIE PROVINCES

ALBERTA: Northeastern Area.—In general crops are a good average stand but moisture will be required during the filling stages. Coarse grains and the hay crop are good.

Southeastern Area.—Crops are well advanced but excessive heat and lack of rain has wrought damage, and all yields will be below average. Western Area Wheat is heavily all headed and a good stand. Heat has adversely affected yield and rain is required. Rye and barley are being cut and coarse grains and pasturage are heavy. The sugar beet crop is making rapid progress and a good yield is expected. Saskatchewan. Northern Area. Wheat is making satisfactory progress and filling well. Cutting has commenced. Coarse grains are progressing favourably. Moisture is required in some districts. Southern Area. More moderate temperatures and scattered showers have afforded some relief during past few days but crops have suffered irreparable damage from hot dry weather. Stubble crops and late sown grain are in poor condition. Fair to light yields of coarse grains are anticipated. Damage from grasshoppers is reported from several districts. There will be a shortage of feed in some sections. Manitoba. Yields will vary considerably. Wheat generally is fair to good and excellent in some northern districts. Coarse grains are good in the north but poor in many localities in other areas.

PROVINCE OF QUEBEC

Grain and corn crops promise well but would be benefitted by warmer weather. Root crops are making favourable progress. Apples look promising and small fruits are abundant. Tobacco shows good growth. Pastures are holding out well.

PROVINCE OF ONTARIO

Cutting of fall wheat is practically completed, threshing is general throughout western and central districts with the yield heavy and of fair to good quality. The cutting of barley is general and oats are ripening rapidly. Average yields are indicated. A heavy hay crop has been indifferently saved. Corn is backward. Root crops are making satisfactory progress. Peaches and grapes promise heavy yield of good quality. Grass pasturage excellent. Tobacco is making favourable progress but the yield will be below that of last year.

MARITIME PROVINCES

The harvesting of an average hay crop has been delayed by heavy rains. Pasturage is ample. Apples look well and small fruits are plentiful.

PROVINCE OF BRITISH COLUMBIA

Haying is completed. The yield is about 70 p.e. of average. Average yield of potatoes and other root crops are expected. Dull weather has delayed the ripening of tomatoes but the delayed thereof, which is on a considerably reduced acreage, appears to be a good one. Indications point to heavy yields of apples and peaches. Estimated

THE HARVEST IS NOW ON!

The grain harvest in the district is getting well under way, and with a steady advance in prices on the Winnipeg Grain Exchange for several days past, the prospects are a little more encouraging, although of course the prolonged drouth during the month just past, has cut yields down quite considerably.

The gamble with the grain market will soon commence, and will be the usual thrilling experience evidently of waiting and watching, and watching and waiting, to get the best possible price for the wheat one has to sell. This is only natural, and of course we would all do the same thing, but the sad part of it is that we often overplay our hand and lose heavily, where we may have gained a little, even though the gain were small.

Several years ago, a number of well known local farmers held wheat waiting for prices to advance to \$2.00 per bushel, and instead of getting \$2.00 per bushel they were finally sold out for as little as 35c. per bushel, when selling at time of delivery would have given a return of \$3.65 per bushel. The same thing has happened several times since, although on a more restricted scale, as prices have not soared to such dizzy heights. In the last three years, but many individual grain crops have been sacrificed waiting for a few cents per bushel more in price.

These statements are not made in any fault-finding attitude. It is merely the fact that we are playing a very uncertain and dangerous game when we set out to beat the market and hold for a definite price. In the first place in the great majority of cases the crop is mortgaged before it is ever threshed. Maybe not in black and white on paper, but mortgaged by word of mouth because of bills in current which we promised to pay as soon as we threshed, and if this is the case then it is mortgaged, because bargains are only kept by mutual consent and the honor of the contracting parties. So that when the grain is threshed it is not ours. We really are expected to sell it, or else assign a certain part of it to our creditors, and if they want to gamble on the market, that is up to them. Of course, when a farmer can pay his bills without selling his wheat, then there is nothing to say, because if he can afford to take the risk that is his business.

Right now it looks as if prices may go higher. But in the experiences of the past who can tell. As the immortal Burns said, "The best laid plans of mice and men gang aft a-glee," so it is with markets and prices today. What seems gilt edge today, tomorrow may be worthless, and what seems sure now, may be tottering in a hour's time. If we planted with the prospects of 32c. wheat and can sell now for 45 or 50c. we are 16 to 18 per bushel better off than we thought we would be, and maybe now is the time to sell. Just maybe:

"BUILDING FOR TOMORROW"

What of the future? How long will this depression last? are questions exercising everybody.

At least one group of people in Raymond believe in the future. The Sugar Company is spending this year \$250,000 to modernize its factory looking toward greater efficiency.

Better times will certainly come before long. Do we people of this district fully appreciate the benefit of having the factory here? Do we realize that it gives the farmer a chance to raise a crop of great commercial value? Do we sense that the raising of beets greatly increases the productivity of our land? Do we remember that it provides employment for hundreds, thus benefitting the whole district.

We wish to see it prosper; let us back it in the most efficient manner possible. Thus we shall make it grow and it in turn will in due time make us grow, securing us employment and better incomes.

Would you like to build yourself up for a brighter future in life? Would you like to overcome the handicaps of lacking college training. You can study at home or at work. You can educate yourselves for the future you wish to be yours; you can master your fate.

In my capacity of Factory Chemist, I have come to know many of you. I appreciate you. May I invite you to gain for yourselves technical training through self-education? I should gladly show any of you what to acquire and how to acquire it, helping you to greater earning power, success and weight in your community. Come and see me, anyone, anytime. I will gladly talk with you in person. Call at my home. You are welcome.

JOHN LANDYSHEFF,
August 8th, 1932,
Raymond, Alberta.

L. D. King and a carload were at the Father's and Son's Outing the first part of the week.

NEW SWEET CLOVER ALFALFA CROSS

How many of our farm readers have seen Alpha? We'll warrant not many, for as yet it is not extensively grown. However, this cross between sweet clover and alfalfa promises to become one of the leading legumes of Western Canada. In Saskatchewan the new feed crop is spreading rapidly, lack of seed being the only thing holding back its cultivation.

Alpha originated at the University of Saskatchewan when Dr. L. E. Kirk Dominion agronomist, discovered these peculiar plants growing in a plot of Arctic sweet clover. Alpha sweet clover appears to be a natural cross between Arctic sweet clover and alfalfa. It has many of the characters of both plants. It has the hardiness and growing ease of common sweet clover under prairie conditions and is a higher yielding than either sweet clover or alfalfa. It resembles alfalfa in that it branches profusely and is fine stemmed and has a feed value somewhat similar to alfalfa.

Unlike sweet clover Alpha promises to be a most economic seed producer, and the average farmer should have no difficulty in growing his own seed supply from a small plot or from a corner of the general field, just as he

now gets his seed grain. Those familiar with sweet clover know that it ripens unevenly. At harvest time, when being harvested for seed, it will have flowers, unripe and ripe seed all on the same flower stalk. Thus, the average yield of sweet clover is fairly small and the handling of the crop for seed rather difficult.

Alpha sweet clover ripens evenly, as wheat does. When the seed is ripe, all the seed on the plant is ripe. The result is that it is a heavy yielder with yields averaging all the way from 600 to 1,000 pounds to the acre. Seeding in rows, three to four pounds of seed is needed per acre. Broadcast ing, about twice the amount of seed is needed. It will be seen that the seed from an acre will sow a large area.

Being Increased Rapidly

At the University of Saskatchewan there are seven acres of this crop near ing harvest. It is seeded in rows three feet apart, and on the first of July was so thick that the rows could not be seen and was a very even stand, just waist high. At the Weed farm at Lockwood are another seven acres with just as good a stand. At the university it is growing on heavy clay. At Lockwood it is growing on sandy loam; sandy loam of the worst kind. There is another large field growing on the farm of James Rugg, Estlow, and Seager Wheeler, Rosthern, also has a large field. In this case sown broadcast, and it is a marvelous crop. There are many other growers with plots in Saskatchewan, and some in Manitoba and Alberta. With the crop prospects for this year as they are seed of Alpha seed clover should not be hard to obtain this fall. There should be enough to have seed plots at least in every district in the west. Experiments have shown this crop to be of a feeding value superior to sweet clover. It pastures well, is easily grown and is equal, if not superior to, common sweet clover as a silage improver. There is every indication that Alpha will supersede all other as a legume crop for Western Canada.

News Notes

Subscribe—Don't borrow your friends

Monday night was one of the hottest nights of the summer so far.

Bill Wheeler of Magrath has leased the Palmer Billiard Parlor and took possession the first of the present week. It will be painted and redecorated before opening for business.

Tuesday was a pretty sultry day, and the fact that a person was perspiring was no criterion that he or she had been, or even intended to do any work.

Joe McLean, Ferce Poulsen, W. A. McMullin, and their wives were in Waterton Park over the week-end. The boys walked up to Carthage Lake recently opened for fishing, and soon had their limit, the fish biting especially good in this new fishing grounds. They were enthusiastic about the fishing in this new lake which is a two hours walk from the Waterton townsite.

Over 100,000 bushels of new grain were delivered to elevators in Southern Alberta between August 1st and Saturday night August 6th, according to reports of the C. P. R. offices.

Hudson's Bay Company posts and branches in Western Canada will be inspected shortly by P. A. Stacpole, Manager for that Company in London, England, who is now in the west, travelling over the lines of the Canadian National.

According to Canadian National Railways, the steamship "Pennyworth" cleared July 30 from Newcastle, August 2 from Antwerp, and is now on the broad Atlantic, Churchill bound, with a cargo, in the nature of a test shipment, consisting of such commodities as window glass, turbed wire cutlery, chinaware, steel and dry goods, routed for the first time via Hudson Bay, to Winnipeg. Such had their limit, the fish biting especially good in this new fishing grounds. They were enthusiastic about the fishing in this new lake which is a two hours walk from the Waterton townsite.

News Notes

A very light shower of rain fell on Monday evening, but hardly enough to settle the dust.

Geo. Brewerton and Lowell Court were in Magrath for a little while on Monday afternoon.

H. E. Wynder of Cardston is laying brick at the Sugar Factory, helping on the Steffens house.

Brome grass on the farm of W. R. Johnston at Clive measured 7 ft. 6 inches when it was cut for hay. This is some height.

J. D. Hall, local Cockshutt Agent, says the orders for binders have been so far above expectations of the Companies, that at the first of the week there was not a Cockshutt binder unsold in all of Alberta.

A "New Way" harvester has been demonstrated on a farm near Winnipeg. Among the saving features claimed for the machine are, it eliminates twice stooping, picks up all heads and saves quality of straw, has power take-off enabling speedy disposal of harvest at one stroke, and save both time and labor. The machine stacks the grain, and, in case of wet weather, these stacks can be speedily removed. It handles any kind of crop.

Seven white whales, caught in the Hudson bay, formed a unique shipment that was brought by train from Churchill to Winnipeg, via the Canadian National lines, last Saturday. The whales, which weigh about 1,500 lbs. each, were brought to the Manitoba capital with the object of testing the marketing possibilities for a rendering plant at Churchill. It is believed that a big market is available in Canada and other countries for the finer oils of white whales and other by-products, which includes material which makes good leather, though the tanning process is somewhat difficult, fertilizer, and ingredients for paints and varnishes.

... as it is, the adage "It's an ill wind that blows nobody good" seems to hold true today. The economic depression is hitting the railway companies harder than any other industry but, because they are not riding, people are walking and that seems to be helping the boot and shoe industry. According to the Industrial Department of the Canadian National Railways, there has been a big increase in the output of the leather industry in Canada this year, as compared with former years.

Canada's wheat crop of 1932 is likely to be harvested from about 25, 168,000 acres of which 2,552,000 acres are in Manitoba, 14,184,000 acres in Saskatchewan, 7,728,000 acres in Alberta and 704,900 acres distributed through the other provinces, according to the Agricultural Department of the Canadian National Railways. The Orient is increasing as a consumer of wheat, China having imported 50,000,000 bushels in 1931, the largest in the history of that country. Australia supplied 65.3 p.c. United States 18 p.c. and Canada 14.5 p.c.

Empire's Brains on Empire's Best Ship

British Government delegates to the Imperial Economic Conference at Ottawa photographed aboard the Canadian Pacific liner "Empress of Britain" and who held a Cabinet Council on the ship, an event unique in marine or government annals. Seated left to right, they are: Rt. Hon. Walter Rensselaer, M.P., Rt. Hon. Neville Chamberlain, Chancellor of the Exchequer; Rt. Hon. Stanley Baldwin, Lord President of the Council; Rt. Hon. J. H. Thomas, Dominions Secretary; standing, Rt. Hon. Sir Philip Cunliffe-Lister, Colonial Secretary; Rt. Hon. Sir John Gilmour, Minister of Agriculture; and Rt. Hon. Lord Halifax, Secretary of State for War.

News Notes

Gen. Brewerton left on Thursday for Winnipeg on a business trip.

Due to the rain the crew working on the silos at the Sugar Factory were unable to carry on their work on Thursday.

Grant G. Woolley, for several years principal of the Magrath High School has accepted a position on the staff of the Cardston High, and will teach there this coming term.

S. B. Card is building another room at the back of the Super Service Station. O. J. Rolfsen is in charge of this work. The old room will be moved over to the square of the one corner, and the new room will fill in the space to the square of the other side.

Head Lettuce from Glenwood on the U.I.D. was placed on the market in Lethbridge the first part of the week and was enthusiastically received by the housewives of the city who declare the flavor is equal if not better than the imported heads from California.

The Boy Scouts got home Wednesday night from Camp Kootenai, wet but happy after a very enjoyable week in camp. L. J. Melhuysen's truck brought the First Ward troop home.

When a subway in New York took fire from a short circuit in the cable many were overcome by fumes from the burning, and had to be helped to the surface by policemen and others who opened the emergency exits. It was two hours before the smoke was cleared out after the fire was extinguished.

News Notes

J. D. Hall was in Lethbridge on Friday morning.

A. W. Kirkham is holidaying from the Mercantile Store at present.

Ken Stone was in Lethbridge Thursday evening to see the family.

HOUSE FOR RENT — Furnished or unfurnished. See Mrs. Coreless or Phone 42.

Thos Allan is back on the job at the Mercantile after his weeks holiday.

The bus slid off the grade just at the edge of town Thursday morning and was one hour late in getting in. The gravel is pretty thin there and is a dangerous place on the road.

It tried hard to rain Wednesday morning, but was unsuccessful. However the day as quite a lot cooler than Tuesday and toward 6 p.m. settled down and gave us a real nice rain for several hours.

EXPECTANT MOTHERS

Pregnancy is a normal process through which the average healthy woman should be able to pass without any special danger. It is, however, a condition which throws an unusual strain upon the body and it is necessary that the body should be prepared for this additional strain.

Every expectant mother should receive pre-natal care. Prenatal care means that early in her pregnancy the expectant mother goes to her doctor. The doctor makes the necessary examinations to ascertain the condition of the woman. Throughout her whole pregnancy the woman remains under the regular supervision of her doctor.

There are many good reasons for pre-natal care. Some women are suffering from abnormal conditions which make pregnancy comparatively unsafe for them. They may not be aware of the fact that they have a contracted pelvis, or that their heart or kidneys are not normal. The early discovery of such conditions allows the doctor to plan for the special care such cases require.

During pregnancy abnormal conditions develop in some cases. These conditions do not as a rule come on suddenly. In general they begin with some slight change which can be detected at that time by proper medical examinations, and, if noted, the more serious developments are prevented.

Pre-natal care is essentially preventive in its nature. It provides the supervision which is the only practical means whereby expectant mothers may be safeguarded from the conditions which sometimes arise as a menace to health and life. To one can say in what woman they will develop, so it is necessary to watch over all expectant mothers through pre-natal care for all.

Not only is it desirable to make pregnancy safe, but it should be made as comfortable as possible. When the condition of the mother is known the

doctor can direct her mode of living so that her health will be maintained and comfort secured at the same time.

It will be pointed out to the expectant mother that her teeth should be put in good condition. There is no reason why dental care should not be received during pregnancy, despite popular ideas to the contrary.

It is important to eat the right kinds of food at all times, and it is

even more important than usual for the expectant mother to do so. The food she uses not only nourishes her own body, but provides the material required to build the body of her baby.

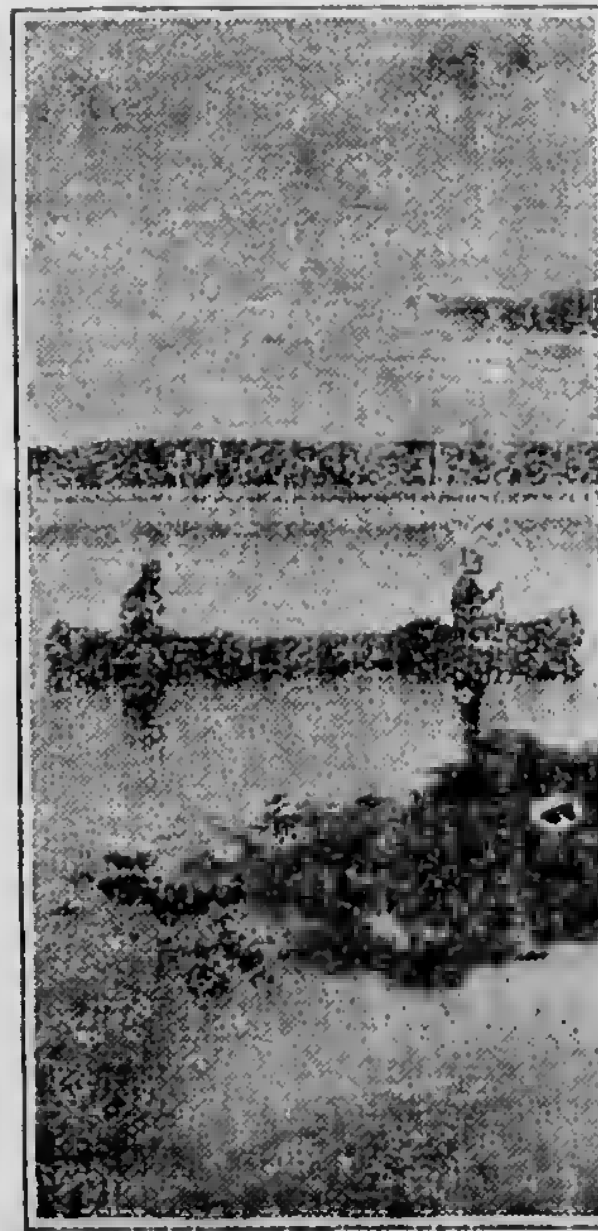

Pre-natal care safeguards both the mother and the baby.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Canoe Trips in Canada

Lakes and Rivers Provide Numerous Attractions

Opportunities for an Enjoyable Vacation Almost Unlimited

kind of trip to be made, whether one requiring much effort and experience, or one quite free from rapid and portages, the canoeist has only to select his route.

Easy of Access

Although railways and the automobile have provided a means of rapid transport, there are countless places in the quiet of the forest, out of reach of either. It is such places, approachable only by canoe, that invite the adventurer to partake of the wonders of nature. The railways and the development of good roads have however made the majority of canoe routes in Canada easily accessible, and one need not travel far from the majority of Canadian cities before reaching the embarkment point of an enjoyable trip.

Forest Beauty

In certain parts one may follow the streams for a long summer outing and never see a village or dwelling, yet civilization lies so close that return is easily possible. Waterfalls, rapids, large and small lakes of singular beauty hidden deep in the forest, and islands covered with pine and spruce trees are among the interesting features encountered on route. In some places one may travel hundreds of miles without meeting obstacles of any kind.

There is a remarkable contrast between the conventionality of modern life and the full naturalness of life in the great forest, where one may relax, amid the beauty of natural surroundings. A strange appeal of imagination comes to one while following the routes of the historic explorers and contentment prevails.

amid the constant change of beautiful scenery.

Fish and Game in Abundance

Canadian lakes and rivers are renowned for the variety and abundance of their fish. Brook and lake trout are numerous, the latter often weighing from fifteen to thirty pounds while other species of fish are plentiful. Eastern Canada is well provided with waterways, well suited to travel by canoe. Canal systems, rivers large and small, rapids, falls, lakes, stillwaters and all the requirements for an enjoyable canoe trip, await the devotee of the paddle. Whether it be a cruise through a well settled region, or an adventurous journey through the wilderness, the canoeist will find an almost unlimited number of lakes and streams.

The waterways of western Canada, in days gone by, assisted materially in unveiling the mystery of the great country between Lake Superior and the Pacific Ocean. Radiating from Lake Winnipeg, are routes of romantic interest. Nestling among the mountains of the coast are many beautiful lakes, also streams that wind through the hills, where sport for the angler and hunter may be found.

Free Information

The National Development Bureau of the Department of the Interior at Ottawa, has prepared a series of four booklets entitled "Canoe Trips," copies of which may be had by our readers, free of charge. The series covers the Maritime Provinces, Quebec, Ontario and Western Canada. Further detailed information is available to those who require specific data on any particular trip.
